I enclose herewith a statement showing the strength and average attendance in the classes for August and September 1945 and the number of teachers at present employed in the schools at Yermal, Arkathabail and Pollipu and Bekal. The District Educational Officer, South Kanara has recommended that an additional teacher of Higher Elementary Grade may be appointed in each of the schools at Yermal, Arkathabail and Pollipu and an additional teacher of Secondary grade in the school at Bekal.

2 When the District Educational Officer visited the school at Malpe on 1-2-46 the number on the rolls then was as follows:--

Standard	I	A ..	52] N
,,		B ..	46]
,,	II	..	55
,,	III	..	35
,,	IV	..	28
,,	V	..	26
,,	VI	..	25
			267

The District Educational Officer has made the following remarks:

"The School needs an additional teacher as II Standard has to be bifurcated. This is a compulsory area and 38 admissions have been made and 55 remain to be enrolled. VI Standard has been newly opened and there is only one Secondary Grade Teacher on the staff. One more Secondary Grade teacher may be appointed".

3 The number of teachers now employed is seven--one Secondary Grade and six Higher Elementary Grade.

p.t.o./

Two more teachers are required one for a third division in Standard I in which more pupils are to be admitted and one for bifurcating Standard II which already 55 strong. Though the employment of a second teacher is for the proposed III division in Standard I, it may be of Secondary Grade as suggested by District Educational Officer. This teacher will be put in charge of standard V and he will take lessons in Standard V and VI and the present teacher of Higher Elementary Grade in charge Standard I will be released to take charge of the new division in Standard I.

I therefore request that Government may be pleased to sanction the employment of an additional teacher of Higher Elementary Grade in each of the schools at Yermal, Kokkathabail, Polippu and Malpe and of an additional teacher of secondary grade in each of the schools at Malpe and Bekal from the middle of May 1946 when the school will re-open after Midsummer vacation till 31-3-1947. The expenditure involved in the proposal will be met from the existing provision under F. Fisheries Schools in the current year budget and got regularised in the course of the year.

Ref: From the D.I.&.C.No.2145.H.5/46, dated 18-4-1946.
Do. " 27-4-1946.

To A.S.

Please see the letter from the D.I.&.C. on pp.1-2 c.f. and its enclosures on pp.3-4 c.f. The D.I.&.C. has requested sanction for the employment of an additional teacher of Higher Elementary Grade on Rs.23-45 p.m. in each of the Fisheries Schools at Yermal, Adakathabail, Pollipu and Malpe and of an additional teacher of Secondary Grade on Rs.30-55 p.m. in each of the Fisheries Schools at Malpe and Bekal from the middle of May 1946 up to 31-3-1947. This is based on the recommendation of the D.E.O. S.Kanara, to appoint an additional teacher of Higher Elementary grade in each of the Schools at Yermal, Adakathabail and Pollipu and an additional teacher of Secondary grade in the Schools at Bekal and Malpe.

A statement showing the strength, average attendance and the number of teachers employed in these schools is on pp.3-4 c.f. According to rule 71 of the Madras Educational Rules, there shall ordinarily be one teacher for every 35 pupils in average attendance though it is desirable to have ane teacher for every 30 pupils. Adopting the more liberal scale of one teacher for every 30 pupils, the necessity or otherwise for the additional teachers asked for by the D.I.&.C. is examined below.

Yermal. The average attendance of all the classes taken together in this School is 115. At the rate of one teacher for every 30 pupils in average attendance, the School is eligible for 4 teachers. But it has now got only 3 teachers.

An additional teacher may be sanctioned for this school.
Y.S.
11-5-46.

Adakathabail. The average attendance of all the classes taken together is 150 and the School is eligible for 5 teachers at the rate of one teacher for every 30 pupils. But it has now got only 4 teachers.

One more teacher may be sanctioned.
Y.S.
11-5-46.

Malpe. The average attendance of all the classes taken

together is 190. If the average attendance of all the classes put together is taken into consideration, the existing staff of 7 teachers at the rate of one teacher for every 30 pupils seems sufficient. But as the strength ~~is~~ in Standard II is 55, the D.E.O. has remarked that this standard requires bifurcation and he has recommended the appointment of an additional teacher of Secondary grade. The strength in Standards I-A and I-B is 52 and 46 respectively. The D.I.&.C. therefore proposes to have a third division for standard I in which more pupils are to be admitted in the next school year and consequently the appointment of another additional teacher of Higher Elementary grade in the school seems justifiable.

N-p1cf

M - p2 cf

It should be possible to ~~arrange~~ manage with the existing staff in view of the A'alone
M.S.
11-5-46.

D-p3cf

Pollipu. The average attendance of all the classes is 132 and the present strength of 5 teachers at the rate of one teacher for every 30 pupils seems sufficient. But the strength in Standard I is 52 and the average attendance is 43. This standard may require bifurcation and consequently the employment of an additional teacher has been recommended by the D.E.O.

In Class I the average attendance is 40 & 46. It may be possible to manage ~~arrange~~ with the existing staff. No addl. teacher is necessary.
Y.S.
11-5-46.

E-p4cf

Bakal. The average attendance of all the classes taken together is 275 and the School is eligible for 9 teachers at the rate of one for every 30 pupils. But the school has now got only 8 teachers. The strength and average attendance in all the standards except Standards IV and V is also above 30.

E-p4-f

An additional teacher seems necessary.
Y.S.
11-5-46.

In the circumstances stated it is for orders whether the D.I.&.C's proposals for the employment of additional teachers will be accepted in this Department. If so, the remarks of Finance may be invited. The extra expenditure involved on account of the proposals will come to Rs.3800/- per annum.

ASST. SECRETARY S. G. G.
TAKE TO DATE
15 MAY 1946
FINANCE DEPARTMENT

28634 E II

Finance(E.II)Department

According to M.E.R. 71, there should be one teacher for every 35 pupils in average attendance, although it is desirable to have one for every 30 pupils in average attendance. On the basis of the more liberal scale and having regard to the daily average attendance in the various classes in the Fishery Schools at Yarmal and Adakathbail, the proposal for an additional teacher ~~of the Secondary Grade~~ in each of them may be agreed to.

2. The following remarks seem called for ~~in~~ respect of the additional teachers proposed for the Fishery Schools at Malpe, Pollipu and Bekal.

1 Additional Secondary Grade Teacher and 1 Additional Higher Elementary Teacher for Malpe.

The District Educational Officer has recommended the employment of 2 additional teachers- secondary grade and 1 Higher Elementary Trained teacher on the basis of the total strength on rolls on 1-2-46, but as already noted above the staff has to be determined with reference to the daily average attendance. Figures of daily average attendance in February 1946 have not been given, but even allowing one teacher for every 35 pupils on ~~rolls~~ the rolls there seems to be a case only for one additional teacher at the most. The additional post may be sanctioned in the Secondary Grade in view of the considerations set out at B on p.1 C.F., and the D.I. & C. asked to utilise it in the best manner possible.

One more teacher is required for the proposed III Std. in Std. I. This may be considered after the daily av. attendance is known sometime after the new year when Std. I is actually opened. For the present one Secondary Grade teacher may be agreed to.

(8)

1 Additional Higher Elementary Teacher for the Fishery School Pollipu

The average attendance of all the classes in the school in August and September 1945 was 132, and the staff consists of 5 teachers. With reference to M.E.R. 71 referred to above, there seems to be no case for an additional teacher. It is true that the daily average

attendance in class I viz. 46, is much in excess of 35, but the strength as well as the daily average attendance in classes III & IV is rather poor that it should not be difficult to hold combined classes. If this is done, one of the teachers can be made available for charge of one of the bifurcated sections in class I. In this view, the case for an additional teacher for this school does not seem borne out, and may be negatived.

D.D. will think combined classes should be encouraged generally in III & IV Standards. Ordinarily each School One Teacher more may be allowed. 18/5

Additional Secondary Grade Teacher for the Fishery School, Bakal.

Judged by average attendance in the school viz. 275, and the normal standard of 1 teacher for every 35 pupils in average attendance, the existing staff of 8 teachers in the school is adequate. No doubt, the average attendance in classes I.A, I.B., II.A, II B, III and VI exceed 35, but the excess in each class is only slight and in no class is the average attendance more than 40. As there are already 8 teachers for the existing 8 classes, and as the average attendance in none of the classes is materially in excess of 35 and consequently unwieldy, the demand for an additional teacher for this school does not seem justified. Finance may advise against the proposal.

We may agree one more S.G. Teacher and see how the attendance figures are during the year. 18/5 ub.

If the above suggestions are accepted, it will be sufficient to sanction 2 secondary grade teacher and 3 additional Higher Elementary Teachers, and the extra cost will be Rs. ~~1907~~ 3220 - p.a. A.P.M. may see.

49.3 × 2 × 12 = 1183.2
98.6 + 40.3 = 138.9
1 Secy. gr. 60.2
198.9 + 31.2 = 230.1
